RED HOT Product
Compressible Firestopping

CEMCO HOTROD Type-X is a compressible intumescent firestopping that provides 1 and 2-hour fire-ratings for both dynamic and static joints according to UL-2079 (for both standard walls and shaft walls) and is sound tested according to ASTM E90.

- HOTROD has a rectangular profile and is easily compressed into the deflection gap between the edge of the drywall and adjoining structure.
- HOTROD is red in color and is easily identified by the inspector.
- HOTROD is non-wicking as it does not wick water, and is non-hygroscopic. HOTROD will not absorb water readily under field conditions.
- HOTROD takes the place of BOTH fire and sound seal-ant and will not shrink, pull away, or harden over time.
- HOTROD can be installed by itself or can be covered with tape and joint compound for exposed walls.
- HOTROD provides 1-hour fire protection with 1/2” x 1” profile and 2-hour fire ratings with 1” x 1” profile.

Optional joint compound and tape can be applied.
